SERVICES FOR ORGANISATIONS

Project management consulting

We assess your current practices, set up the methodology that fits your projects and train your teams to apply it, with ongoing monitoring to adjust along the way.

3

strands: assessment, method, teams

4

methods: Agile, Scrum, Waterfall, PRINCE2

On request

depending on scope and length of support

01

WHAT'S AT STAKE

Projects delivered on time and on budget

Your projects slip on deadlines or budget, teams struggle to coordinate, risks arrive unannounced. Rigorous project management helps you plan, monitor and communicate better with stakeholders.

We start by looking at how you work today: your strengths, your weaknesses, your challenges. We then set up a suitable methodology, Agile, Waterfall or hybrid, and train your teams to use it.

There is no one-size-fits-all method: the choice depends on the nature of your projects, your deadlines, your budget and your teams.

What the support gives you

- Better controlled planning and execution
- Deadlines and budgets more consistently met
- Risks identified and monitored
- Better collaboration between teams

02

THE FORMATS

Support in three strands

You can choose one strand or all three. Scope and length are agreed with you.

Assessment

Analysis of your needs and assessment of the project management practices in place.

YOU GET

Your strengths, your weaknesses and recommendations on your processes and tools.

Setting up a methodology

Agile, Scrum, Waterfall, PRINCE2 or a hybrid, with tools such as Jira, Trello, Asana or Microsoft Project.

YOU GET

A customised plan: goals, schedule, resources and indicators.

Training and support

Training sessions, practical workshops and coaching for your project teams.

YOU GET

Your teams at ease with the method and tools, supported during their projects.

03

HOW IT RUNS

From assessment to monitoring

Here is the typical sequence, adjusted to your organisation and your projects.

1 **Needs analysis**

Your goals, your projects and the challenges your teams face.

2 **Assessment**

Strengths and weaknesses of current methods and tools, then our recommendations.

3 **Customised plan**

Chosen method, goals, schedule, resources and key performance indicators.

4 **Training**

Sessions, practical workshops and coaching on the method and tools.

5 **Monitoring**

Deviations spotted, corrective actions, planning or resources revised if needed.

A method chosen for your projects

Agile for projects that need frequent adjustment, Waterfall for fixed and predictable requirements, or a hybrid approach. The choice takes into account:

- **The nature of the project and its requirements**
- **Deadlines and budget**
- **Your current practices and your team's preferences**

04

WHO DOES WHAT

What we handle, what you bring

What you get

What you need to steer your projects and measure progress.

- The assessment of your practices and our recommendations
- A project management plan: goals, schedule, resources, indicators
- Success indicators: deadlines, budget, quality of deliverables, satisfaction
- Your teams trained in the chosen method and tools

Our part

- Analysing your needs and practices
- Recommending a method and tools
- The project management plan
- Training and coaching your teams
- Monitoring and adjustments

Your part

- The projects to support and their goals
- Someone who owns the initiative internally
- Team availability for the sessions
- Access to your project tools and documents

05

THE OFFER

A quote that fits your needs

Each engagement is built for you: the price depends on the strands chosen and the time spent with your teams.

On request

What shapes the quote

- The strands chosen: assessment, method, training
- The number of projects and teams involved
- The number of training and coaching sessions
- How long monitoring lasts

The schedule is set with you during scoping.

Would you rather train your teams?

The “Scrum” course prepares them to run their projects.

06

BEFORE YOU START

Questions to ask yourself

Where do your projects slip today: deadlines, budget, quality?

Do your projects have fixed requirements or do they change often?

Which tools do your teams already use?

Who will carry the method once the support ends?

How will you measure the success of your projects?

Next steps

01

Write to us

Your projects, your teams and what is not working today.

02

Scoping

A conversation to choose the strands and the schedule.

03

Quote

A detailed proposal, then the assessment.
